

1. APPROVAL REQUIRED FOR CHANGES IN DESIGN, TOOLING, PROCESSING, OR MANUFACTURER-NON-LLNL DESIGN PRODUCT (Clause E-16.1) (April 1999)

Seller shall obtain advance approval from Buyer for any changes in design, tooling, processing, or location of manufacturer after receipt of tool made sample, qualification sample, or engineering evaluation approval. Production shall not be delayed pending approval or in anticipation of such changes except upon written notification from Buyer. The term "tooling," as used in this paragraph, refers to Seller's standard tooling as well as special tooling furnished or authorized by the Buyer. Approval of such samples shall not waive Seller's obligation to make deliveries in conformity with the applicable drawings and specifications.
