

1. QUANTITATIVE INSPECTION REPORTING (Clause E-7.1) (November 2021)

Seller shall furnish quantitative inspection data for the parts sampled as specified in the sample plan table set forth below. The quantitative inspection data shall include 100 percent of the drawing dimensions unless otherwise specified in the product definition or herein. One copy of the data shall be enclosed in Buyer's Technical Data Envelope (1424) and shall accompany the parts. The inspected parts shall be identified with a number (serial number if so identified in the product definition or herein) on a tag and attached to the part. These numbers shall correspond to the related inspection data. The quantitative inspection data shall be shown as a separate item on the packing list. Seller shall notify the Buyer of any discrepancies prior to shipping the parts.

Note: Classified inspection data shall be handled in accordance with Buyer's written instructions found herein.

The following Sampling Plan shall be used, unless specified otherwise in the product definition or herein.

| <u>LOT SIZE</u> | <u>SAMPLE SIZE</u> |
|-----------------|--------------------|
| 1-40 | 05 |
| 41-180 | 10 |
| 181-500 | 15 |
| 501-800 | 25 |
| 801-1300 | 35 |
| 1301-3200 | 50 |
| 3201-UP | 75 |
