

1. BERYLLIUM WARNING LABEL (Clause F-3.1) (November 2021)

Seller shall affix to the outside of each shipment, i.e., shipping container, pallet, wire basket, etc., an adequate number of buyer-furnished beryllium warning labels. The labels shall be placed in visible locations that will not interfere with shipping label information.

In addition, parts and material samples having exposed (unplated) surfaces containing more than 0.1% beryllium shall be packaged one part per plastic bag or plastic container and each bag/container is to have a buyer-furnished beryllium warning label attached.
