

## **1. FOREIGN OWNERSHIP, CONTROL OR INFLUENCE (FOCI) (Provision K-9.1) (April 2022)**

This procurement may involve access to classified information or special nuclear material as defined at 10 CFR Part 710. In order to qualify for award of this procurement, the Offeror/Quoter must be granted a clearance by the U.S. Department of Energy (DOE) regarding foreign ownership, control, or influence over its business or organization. Proposed subcontractors at any tier that will have access to classified information or special nuclear material must also be granted a FOCI clearance by DOE.

If the Offeror's/Quoter's proposal/quotation is selected by the Buyer for further award consideration, Offeror/Quoter agrees to promptly furnish Buyer all information and documents required by the DOE to process FOCI clearances for the Offeror/Quoter and its proposed subcontractors. Failure of the Offer/Quoter to promptly provide the Buyer the necessary information and documents to process FOCI clearances may render the Offeror's/Quoter's proposal/quotation ineligible for award.

The DOE may recognize FOCI clearances granted by other federal agencies. Accordingly, if the Offeror/Quoter or any of its proposed subcontractors possess a current FOCI clearance from any federal agency other than DOE, provide a copy of the FOCI clearance determination from the granting federal agency as a part of your proposal.
